Note:

Please read this manual and any other info included, prior to using this product.

It is important to be aware of the warnings for the safety of all users and the device.

- DO NOT setup or make any setup changes while driving vehicle. Make sure vehicle is stopped and parked safely before entering any set up info or changes.
- It is illegal and unsafe to play any video that may be viewable by the driver in most regions. Please obey all rules and regulations.
- Navigation is for reference only. Routes, reception, and road conditions may change without notice.
- Do not attempt to install or repair the device. Installation and repair of device is dangerous and should not be attempted by anyone other than an authorized installation or repair center.
- Do not touch the screen with sharp objects. Do not press against the screen with hard objects. Doing so will damage the screen display or touch screen.
- To ensure the device works normally and to prevent damage, do not expose the device to extremely damp air or liquids of any kind.

Insert MicroSD Card in correct direction. Do not insert foreign object in the card slot.

It may damage or cause electric shock to the product.

Quick Guide

1. Overview

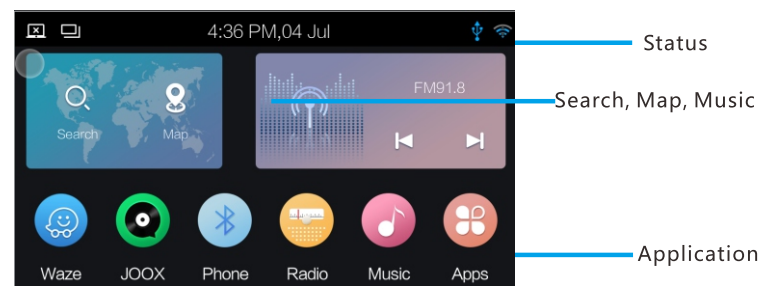

1. Power key
2. Back / Exit key
3. Home key
4. Volume – key
5. Volume + key
6. Reset slot
7. Micro SD card slot
8. USB port
9. Aux port
10. Touch Screen Area

2. Home Screen

The home screen is the starting screen. Waze, Spotify, Phone, Radio, Music, Apps shortcut are displayed on the home screen. Tap any icon to go to the corresponding application page.

To return to home screen press the button on the front panel/screen.

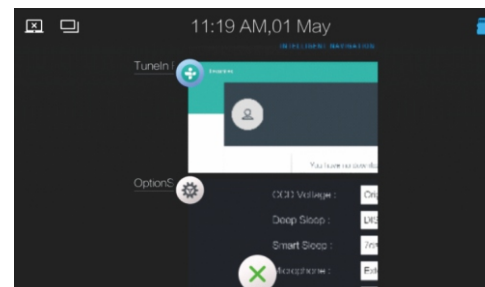

Switching apps

Click icon to access the list of recently used apps.

Click a thumbnail to open recent apps.

Swipe left/right on a thumbnail to close the corresponding application.

Click icon to close all apps.

Screen off/on

Click  icon, the screen turns off. Click any point on the screen will turn on the screen automatically.

Click  icon, will return to previous screen.

3. Scroll Down Menu

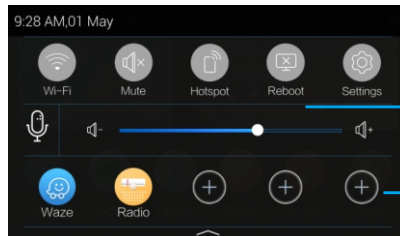

Drag the status bar down to open the scroll down menu.

To close, press  icon.

Default quick functions: Wi-Fi, Mute, Hotspot, Reboot, Settings, Voice assistant and Volume +/-.

Customize quick apps: Press  icon to select desire function from the list.

To replace selected quick apps, press and hold the icon.

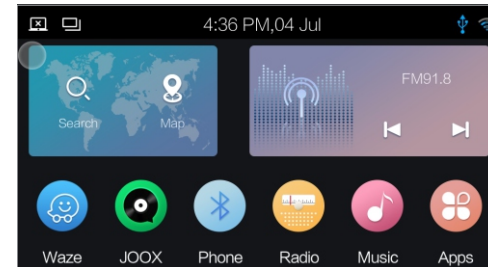

Default quick function

Customize quick apps

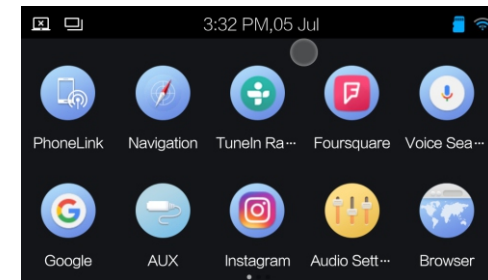

Applications & Features

Application List

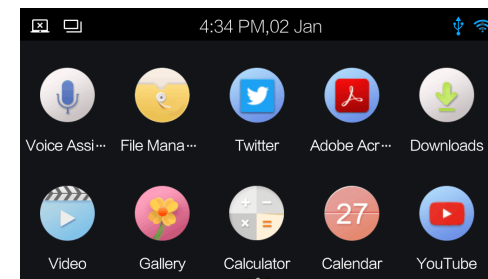

Press  to enter application page.

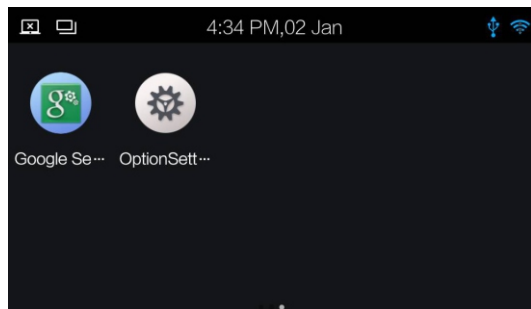

Apps Shortcut

Swiping left or right for the next or previous page

1. Phone

To pair the system with a mobile phone and to use the hands-free function via Bluetooth technology.

Note: The Bluetooth communication range is approximately 5 meters.

■ Pairing the telephone

- Turn on mobile phone's Bluetooth function.
- Tap Phone on Captur multimedia system Home Screen.
- Tap 'New Devices' to search for your device and select the correct device name.
- On your mobile phone enter the pin code 0000 to pair to Captur multimedia system.

■ Dial or Answer a Call

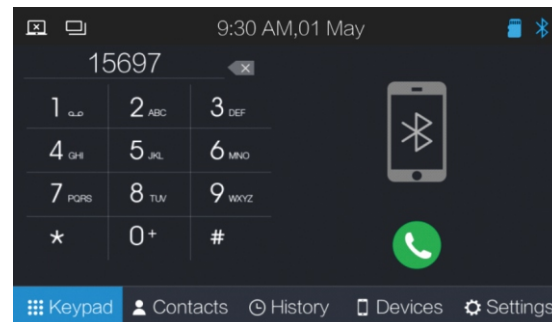

Using Bluetooth function to dial, receive and reject calls.

Note:

1. Please ensure the mobile Bluetooth has been connected with the Captur multimedia system.
2. Multiple calls are not support for this device.

Dial a Call using Keypad

1. Enter the number on the keypad, and then tap  dial.

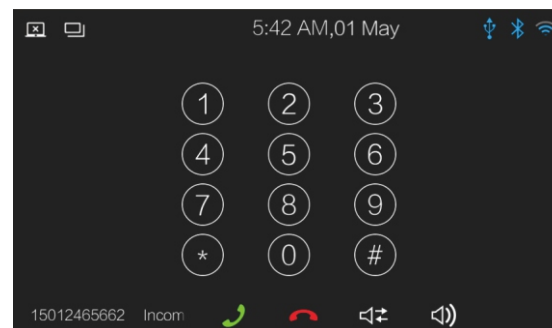

Dial a Call from Contacts

1. Tap 'Contacts' function, search from contact list.
2. Tap on the contact name to dial.

Answer a Call

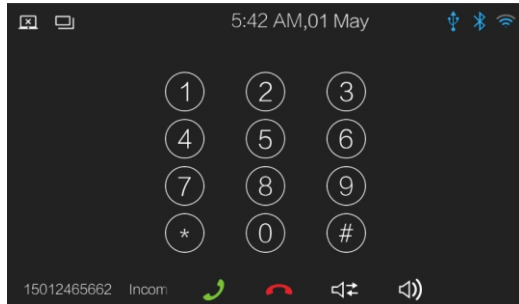

Tap dial icon to answer an incoming call. 

Tap the decline icon to end/decline a call. 

Switching the Call

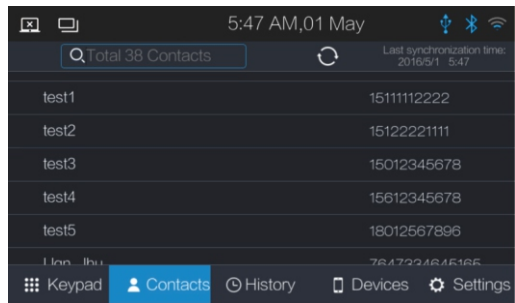

During the call if you want to switch the audio from car speakers to mobile speaker tap icon.

Contacts

Contact list will be synchronized to the system when you tap icon. After the phone book stops updating, you can see all the contacts here.

To add new contacts Sync Address Book again by tapping icon.

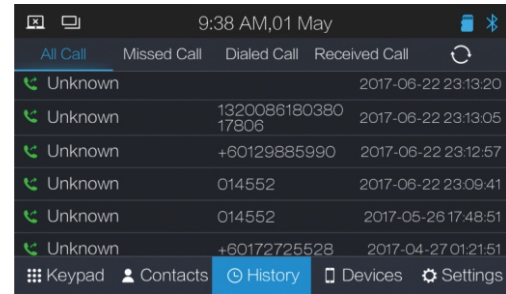

History

All Call, Missed Call, Dialed Call and Received Call records will be synchronized to the navigation system when you tap “ ” icon.

All Call

Tap the All Call icon to view missed call, dialed call and received call records.

Missed Call

Tap the Missed Call icon to view missed call records.

Dialed Call

Tap the Dialed Call icon in the History of Phone interface to get dialed call records.

Received Call

Tap the Received Call icon in the History of Phone interface to get received call records.

Devices

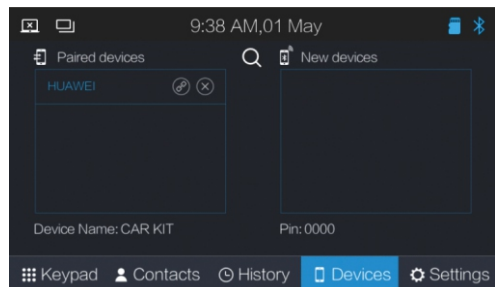

View paired Bluetooth devices and new devices.

•To search a new device, tap .

•To connect a new device, search the device name as shown below from your mobile phone and select the name. Pin:0000

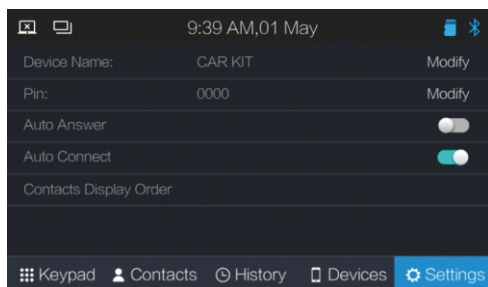

- To reconnect a device, select the device and tap
- To disconnect, select the device name and tap
- To delete a device from list, press

Note: You can also slide left to disconnect or delete the device.

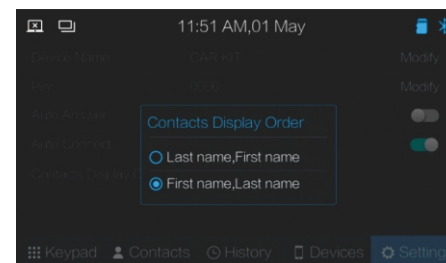

■ Settings

Enter settings page in the Phone interface to view or modify the device name and Pin code.

Note:

15. Adobe Acrobat

16. Voice Search

Quickly search your phone, the web, and nearby locations by speaking, instead of typing. Call your contacts, get directions, and control your phone with Voice Actions.

Note: Connect to a hotspot network with internet data connection to use the app.

17. Foursquare

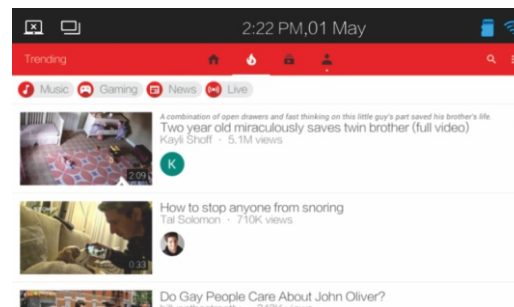

Note: Connect to a hotspot network with internet data connection to use the app.

18. Instagram

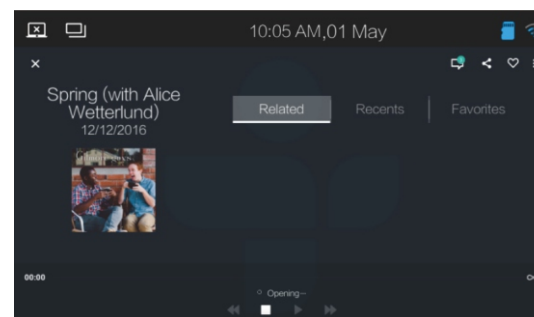

Note: Connect to a hotspot network with internet data connection to use the app.

19. You Tube

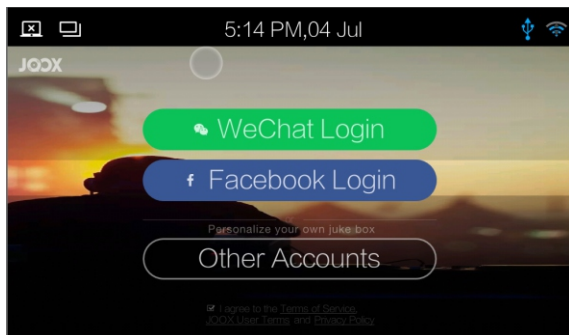

Note: Connect to a hotspot network with internet data connection to use the app.

20. TuneIn Radio

Note: Connect to a hotspot network with internet data connection to use the app.

21. JOOX

Note: Connect to a hotspot network with internet data connection to use the app.

22. Google Setting

23. Phone-Link

Phone-Link achieves the effective connection between Smart Phone and Captur Multimedia System.

1. Connect Android Phone through USB Cable:

Please ensure that "USB Debugging" mode is enabled in your mobile Phone.

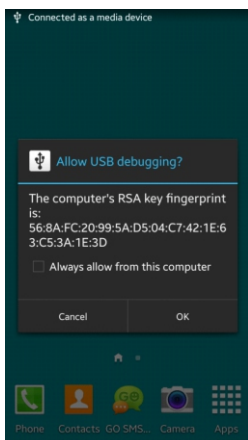

Note:

If "USB Debugging" mode is not enabled in your Mobile Phone, then please follow the below steps to enable it:

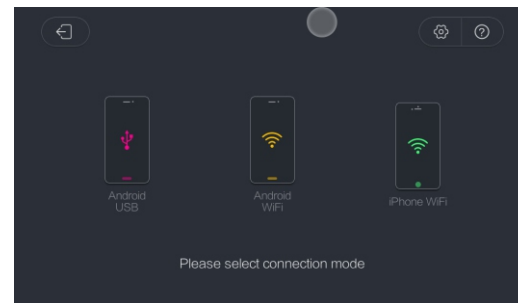

→Go to your Mobile Setting and tap "About Device" by continuously pressing "Build Number" to enable "Developer Options".

→Now go back to settings menu and tap "Developer Options" to enable the "USB Debugging".

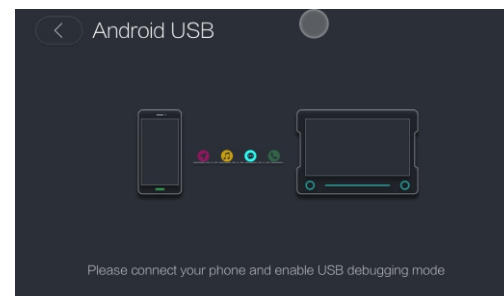

Connect your Android Phone with Captur multimedia system through USB cable and you will see the below option on your Android Phone screen. Tap "Always allow from this computer" and press OK.

Open the "Phone-Link" application in Captur Multimedia System and tap "Android USB" to connect the Android Phone. (As shown in picture)

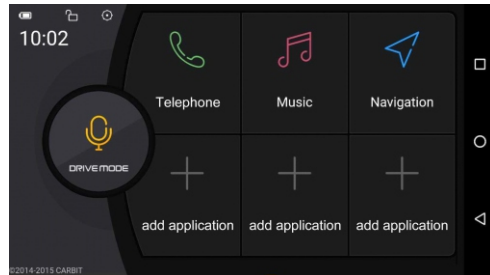

Now your phone is connecting..... (As shown in picture)

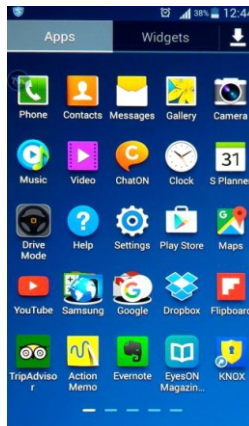

When the Android Phone is connected with Captur Multimedia System, "Drive Mode" application will be installed automatically in your Android phone.

Drive mode application will run on your Android Phone and Captur Multimedia System automatically. (As shown in picture)

To exit from "Drive Mode" press back key from your Android Phone. Your Android Phone screen now will be mirrored on Captur Multimedia System.

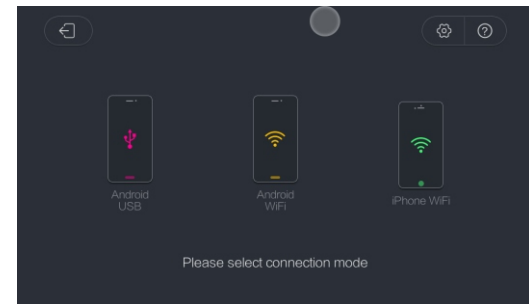

Note: To enable "Drive Mode" option tap "Drive Mode" application through your Android phone.

2. Connect Android Phone through Wi-Fi:

If you want to connect your Android Phone through Wi-Fi, then you should follow Step 1 "**Connect Android Phone through USB Cable**" (Only one-time requirement).

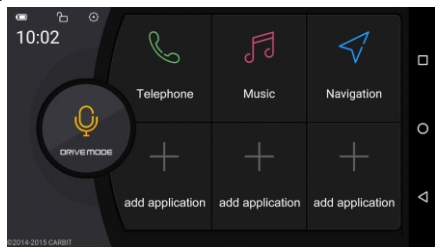

Make sure that your Android Phone and Captur Multimedia System is connected on same Wi-Fi network. Open "Phone-Link" application in Captur Multimedia System and tap "Android Wi-Fi". (As shown in picture)

Now your Android Phone is connecting.....(As shown in picture)

When your Android Phone connects with Captur Multimedia System you will see "Drive Mode" application screen on Android Phone and Captur Multimedia System.

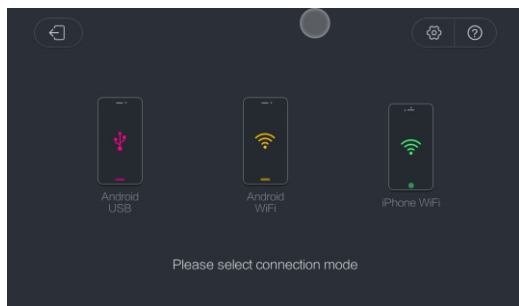

To exit from "Drive Mode" press back key from Android Phone. Your Android Phone screen now will be mirrored on Captur Multimedia System.

Note: To enable "Drive Mode" option tap "Drive Mode" application through your Android phone.

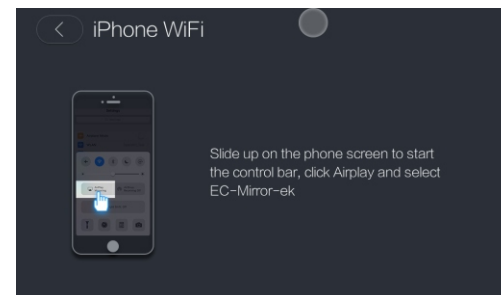

3. Connect iPhone through Wi-Fi

Open your iPhone "HOTSPOT" and connect Captur Multimedia System with it.

Open "Phone-Link" application in Captur Multimedia System and tap "iPhone Wi-Fi". (As shown in picture)

Swipe up on your iPhone screen and tap AirPlay. (As shown in picture)

Tap the device name and turn on Mirroring.

Now your iPhone has been connected and you will get your iPhone screen on Captur Multimedia System.

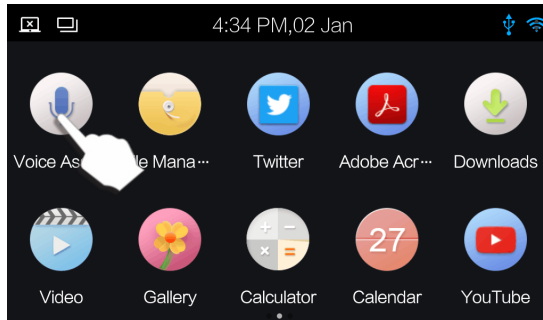

Note:

Please make sure that your Smart Phone Bluetooth is connected with Captur Multimedia System for Audio Playback.

24. Voice Assistant

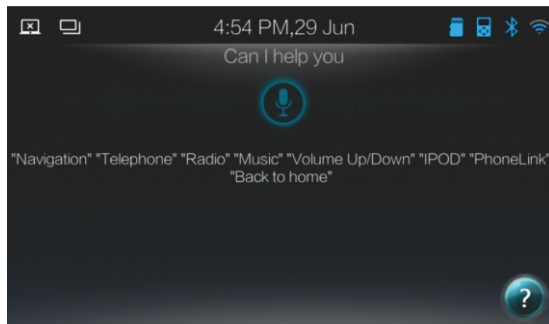

Voice Assistant is a feature that allows the users to control the system by voice commands. The user only needs to activate it and give a command to make the system do the right operation.

Activate the Voice Assistant

Tap Voice Assistant in the application list to activate the Voice Assistant feature. Then a voice saying "Can I help you" will be heard. You must give a command from the list given or the system will say "Time out" and exit.

Say a Command

Say a command to make the system do the operation for you. In different modes, you can choose the words listed in the Voice Assistant application. If a command is not included in the given list, the system will not recognize or will cause a wrong operation.

Caution: Working of Voice Command depends on user's accent and environment.

25. Navigation

Navigation app for searching locations and navigating to places even when offline. With connectivity, users can search online for more and accurate results and update the map database.

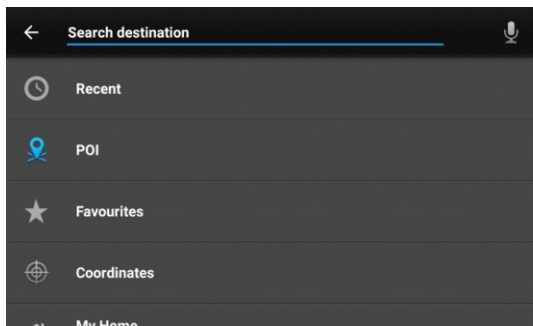

■ Search

Using 'Search' function to search for location, roads and etc and then select the desired result.

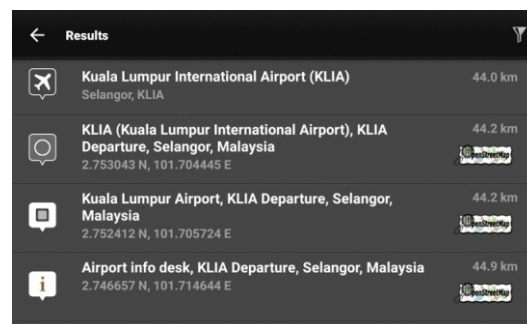

If not results appear, press 'Search Online' to search for more results.

(Note: Internet connectivity is require)

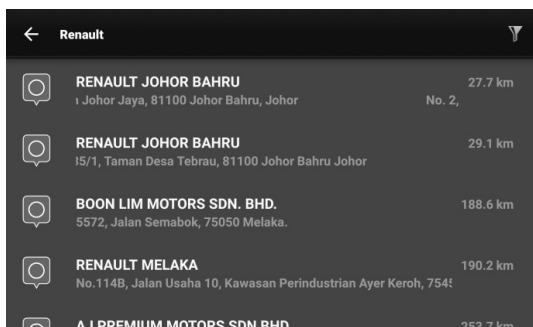

■ Filtering

To filter the result list by category (POI, Address, Roads) or location (City, State, Country), press the icon at top right corner.

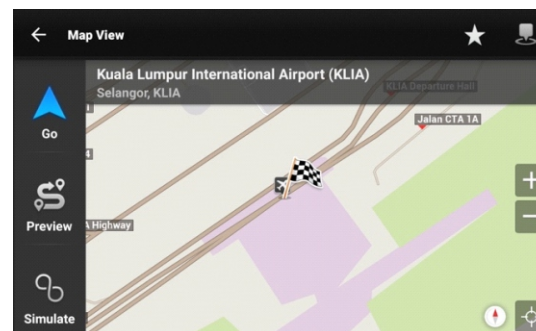

■ Search for Renault Showroom or Service Centre

To search for Renault showroom or service centre, press 'More' then the 'Renault' icon.

■ Set a Destination

To start navigation, select the desired result then press 'Go'.

■ To End/Stop Navigation

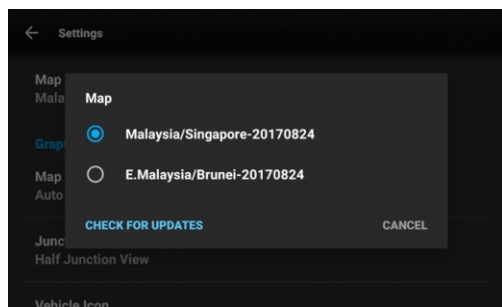

Navigation will end automatically once user reaches the destination. To stop manually, press the 'X' stop navigation icon at navigation main page.

■ To Select / Update Map

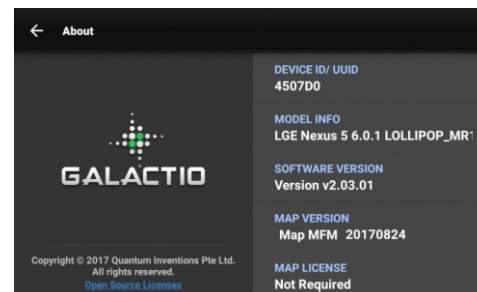

To update map, go to 'Setting' then press 'Map'. Tap on 'Check for Updates' and continue to next step if update is available.

To select map, press the correct map database. User shall select current region to ensure apps work normally.

■ About

Information about navigation map service provider, device ID, version and license. Ensure navigation SD Card is insert into the SD card slot and do not remove the card when navigation apps is running.

26. Specifications

FM Tuner

Frequency Range	87.5 MHz- 108.0MHz
Usable Sensitivity (S/N : 30dB)	10±5 (Typ 5dB µV)
Stereo Separation	≥27dB (Typ 30dB)

AM Tuner

Frequency Range	531 kHz - 1,620 kHz
Usable Sensitivity (S/N : 20dB)	≤28dBuV (Typ 23µV)
Selectivity	≥40dB (Typ 50dB)

Amplifier

Maximum Power Output	25W x 4ch
	Yes
Audio DAC	44.1kHz/16bit
	Volume/Balance/Bass/Treble/Fader

Hardware

Built-in Flash Capacity	16GB eMMC
Operating System	Android
WiFi module	MT5931A/B.TFBGA-84.AUTOCHIPS
Bluetooth module	MT6622N/B.QFN-40.AUTOCHIPS

General

Panel Dimension	241*126.1* 64mm
Net Weight	1.16kg
Head unit Operation Voltage	9~16VDC
Operation Temperature	-20°C~70°C
Storage Temperature	-30°C~80°C

Note: Specifications and designs are subject to change without notice for further improvement.

27. Care and Maintenance

Captur multimedia system utilizes highly precise and sensitive technology and should be used with care. Please follow the following instructions to help you fulfill warranty obligations, and extend the life of your device.

- Keep all parts and accessories away from small children. It is not recommended to allow children less than 12 years of age to operate this device.
- Keep device dry. Exposure to water, liquids, or moisture may cause damage to the vehicle or device, and may cause physical injury.
- Do not expose the device and/or its components to excessive heat. Prolonged exposure to high temperatures will shorten the life span of electrical components, damage internal batteries, and/or warp/melt certain plastics.
- Do not expose the unit and its components to excessive cold. Uneven temperature changes can cause moisture to form inside the unit, or components to break, causing damage to the internal components or screen.
- Do not drop, bump or excessively shake the unit. Doing so may damage the unit and void the warranty.
- Do not attempt to open or disassemble the device. Doing so will void the warranty. If you are having issues with your device, consult distributor or authorized repair facility.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.
- When using or storing this device, keep it away from electromagnetic and/or radioactive fields/equipment.
- Do not use sharp objects to operate the LCD touchscreen, as it is very easily scratched. To operate, please use the tip of your finger.

Warning:

If you meet the following situations while using the device, this troubleshooting guide is meant to help you solve the problem quickly. If the problems are still not resolved after following this guide, please consult an authorized repair or installation center. Do not disassemble or remove the device! This may void your warranty, and/or lead to personal injury. Some applications in the system are for demo purpose only. User must buy full version online for extended use.

Problems	Reasons	Countermeasures
Startup failure	The fuse may be burned.	Replace the fuse with same rated current.
Touch screen does not work	The system is processing some programs.	Wait for a while. Press reset (RST) switch located at front panel to reboot if still not functioning.
System speed is affected.	Too many applications are running at the same time.	Press switching apps icon at status bar and then close the apps
The screen is black with no images or monochrome when playing video.	Brightness, Contrast or color saturation is adjusted too low.	Readjust the brightness, contrast, color saturation to ideal state for watching.
CCD camera shows no image.	Camera function off.	Camera function off Countermeasures: Go to setting, others, CCD. Turn on the CCD camera function

GPS fails to find the current position	GPS antenna is not connected.	Have a qualified installer check connection.
Blank on the map	Navigation may be set with too large or too small proportional size.	Try to change the zoom ratio to see if it can return to the map display. If it is still not solved, please restart the map application.
Video not playing	Formats not supporting.	Supporting formats are: MP4, MKV, MOV, MPEG-2, XVID.
